BEST CHOICE, YOUR CHOICE

BEST UNIFORMS

Bestuniforms was founded in 2015 in Thurles, Co. Tipperary, Ireland. At the beginning, we sewed uniforms ourselves. We operated locally in Ireland first, and over time also in Northern Ireland, UK and EU markets.

Bestuniforms was created for the medical and beauty sector employees. We have been providing you with uniforms / scrubs of the highest quality and at the same time comfortable and fashionable for 5 years. Every year our offer is extended with new products. Now it is not only medical and beauty uniforms for ladies, but also uniforms for men, communion accessories, gowns and caps.

We have always tried to meet the changing needs of our clients. That is why, we decided to introduce to our offer 'something for everyone' - CASUAL clothes. Our new collection includes a range of T-shirts, Polo shirts, sweatshirts, shirts, jackets, workwear (construction, road works) and many more. DRESS YOUR ENTIRE FAMILY WITHOUT LEAVING HOME! We offer a wide range of colors and sizes for ladies, gentlemen and children. IF YOU DECIDE TO ORDER FROM A CONSULTANT, YOU WILL RECEIVE THE DELIVERY FOR FREE STRAIGHT TO YOUR DOOR! If, on the other hand, you prefer to browse the Internet, please visit our website www.bestuniforms.ie

*We hope you enjoy your experience with Bestuniforms World!
We would like express our gratitude and we appreciate your custom.*

2015

Bestuniforms is established. We operate on the local market in Ireland. We sew medical and beauty uniforms.

2016

We are expanding our offer with gowns & caps. We want to be with you not only at work but also on such an important day as GRADUATION.

2017

New products are added to our collection - towels and sheets.

2018

We care for your children on the First Holy Communion Day - a new collection of communion accessories.

2019

Men's collection- uniforms for the medical sector.

2020

* health is our priority - face masks, hand sanitizers, disposable gloves.

* we not only sew our own products but also establish cooperation with other companies (we introduce new brands - Maevn, etc.).

* new Bestuniforms catalogues are created with an offer for everyone!

Thank you for taking time to read our story. By ordering products from our consultants, you support local business / create new jobs.

CONSULTANT'S DETAILS

BESTUNIFORMS. BEST CHOICE, YOUR CHOICE!

HOW TO ORDER - IT'S EASY. JUST FOLLOW THESE STEPS:

- Pick your product from Bestuniforms book
- Contact your Bestuniforms consultant (you can find consultant's details on page 2 and give her/him product name/code, size, colour code and quantity).

HOW TO CORRECTLY DO IT?

Example 1:

If you pick Basic 134 colour white size L quantity 2
- give your consultant these details:

- product name/code: Basic 134
- product size: L
- colour code: 00
- quantity: 2

Example 2:

If you pick Basic 134 colour yellow size M quantity 1
- give your consultant these details:

- product name/code: Basic 134
- product size: M
- colour code: 04
- quantity: 1

These product's details allow your Bestuniforms representative to order the right item for you.

Place your order

Ask your Bestuniforms consultant for estimated delivery time

Wait patiently for your goods

Pay consultant for your products ON DELIVERY DAY

Enjoy your purchase

If you're not happy with your purchase or if the size doesn't fit return product in 7 days from your purchase directly to your consultant free of charge*. Bestuniforms representative will give you back your money or exchange product for a different size.

* You'll receive your refund/exchange only if product is unused, in original package and with original tags on.

If you're happy with your products please leave positive feedback or 'like us' on our Facebook page.

You can also find there all the latest news about our clothes, promotions, offers, job opportunities and loads more!

Remember, you don't have to pay for anything until you receive your goods!

Have cash ready on the day of delivery.

You'll get your order free of delivery charge, straight to your door!

MALFINI® Premium

The exclusive brand MALFINI Premium® will dazzle you with its quality and precision. Fine materials, sophisticated details and inspiration from global trends come together to form a product, that will satisfy even the most demanding. The MALFINI Premium® collection emphasizes confidence and elegance, shows affiliation with a company or club and connects the heart of the wearer with your brand.

MERINO

Everything about merino wool...

Merino wool is world renowned for its soft, yet firm feel, offering advantages in every area over common wool and many other fibers. The reason for these qualities is the size of an individual fiber – and merino wool fibers are very fine, thinner than 18 microns. As such, it is used in every area of fashion from haute couture robes to highly functional garments.

This natural wool is sheered from the Merino breed of sheep, kept in natural environment (open field), with most of the production comes from Australia, New Zealand and Argentina. Because sheep don't stop growing wool, they need to be sheered every year. Not only is wool a renewable resource, it is also biologically degradable – after you throw it out, it will decompose and provide soil with nutrients.

How to take care of it

You can use washing machine up to 40°C temperature, making maintenance easy. Of course, we recommend washing inside out and with similar colours. To preserve the shape, avoid drying in direct sunlight and heat, and iron only using steam at medium temperature. If your merino clothing catches a slight odor, just airing it properly should be enough to remove it.

Characteristics

Breathable

Wool fibers can absorb a lot of moisture and lead it away from the body, and merino wool is even better at it.

Thermo regulating

Unlike synthetic materials, merino fiber is active and reacts to body temperature changes. It retains heat when the weather is cold, and cools down when it's hot.

Odor resistant

Merino wool has antibacterial effects and absorbs sweat. Clothes from it stay nice and fresh much longer, and in worse conditions.

Naturally elastic

Each fiber works like a small "spring", expanding and contracting back into shape. The fabric, as a result, doesn't wrinkle.

Pleasant to wear

The fine, flexible fibers of merino wool make it very comfortable overall. It is soft to the touch, pleasant to wear even directly on skin, unlike most other types of wool.

NEW NOVELTY

New product. For information about stock availability please contact our sales department.

🎨 NEW COLOUR

New colour. For information about stock availability please contact our sales department.

📅 On stock: First quarter of the year 2020 / Second quarter of the year 2020 / Third quarter of the year 2020

FAMILY CONCEPT

Product available in gents, ladies and kids style.

ELASTANE

A synthetic fiber that contains polyurethane bonds of high elasticity.

DUO

DUO CONCEPT

Product available in gents and ladies style.

COOL/WARM

Soft, easy care, quick-drying and conductive fabric.

SILICONE FINISH

The silicone finish is similar to the effect of fabric softener, however more lasting. It makes the product soft to the touch, more dirt-proof and the prints hold much better.

3 in 1

3 in 1

Multi use jacket can be worn as one whole winter jacket, or separately as a windbreaker and a fleece

ANTIPILLING FINISH

The antipilling finish lowers the pilling tendency of the fabric.

4 in 1

4 in 1

Multi use Hi-Vis workwear jacket can be worn as one whole, upper and inner part separately, or just the upper jacket without sleeves as a vest

WINDPROOF

Windproof material prevents wind and chills from penetration.

TEAR OFF

Tear off label.

WATERPROOF

Rating in millimetres to indicate material's resistance to water pressure. The higher the water column is, the longer the fabric will remain waterproof.

STICKER LABEL

Label in a form of a sticker. Can be easily taken off.

BREATHABLE

Rating in g/m² per 24 hours. The ability of a fabric to allow moisture vapor in grams in square meter per day. The higher the value is, the better fabric breathes.

LABEL FREE

The products have only a small size label behind the neck for easy rebranding

EXTRA DRY

Extra dry material.

FLAT SEAMS

Double-sided cover stitch which is flat ensures maximum wearing comfort.

TAPED SEAMS

Technology supporting the waterproofness of material at seams. The waterproof tape is applied thermally under pressure over the inside seams.

Selected garments from the collection HIGH-VISIBILITY (HV) RIMECK® correspond to the international standards, which determine the optimal form of protective Plaining with high visibility. Certified garments from the HV collection are supplied with a leaflet providing information on proper storage, treatment and purpose.

EN ISO 20471:2013 – High visibility Plaining – this international standard specifies requirements for Plaining with high visibility, which is able to visually indicate the presence of a user for vehicles or other mechanized means of transport under any light conditions, both in daylight and when illuminated by headlights of vehicles at night.

High visibility Plaining are made of fluorescent material, and in combination with reflective stripes are divided into three categories:

Category 3 – the highest level of protection – the minimum required substrate surfaces 0.80 m² and 0.20 m² of retroreflective material

Category 2 – the median level of protection – the minimum required substrate surface is 0.50 m² and 0.13 m² of retroreflective material

Category 1 – the minimum level of protection – the minimum required substrate surface 0.14 m² and 0.10 m² of retroreflective material.

EN 1150:1999 – Protective Plaining – caution Plaining with high visibility for non-professional use – standard specifies requirements for optical properties of caution high visibility Plaining suitable for adults or teenagers, not for professionals. The garments are designed for visual indication of the presence of users in all light conditions, both in daylight in urban lighting and when illuminated by headlights of vehicles at night.

EN 343:2003+A1:2007 – Protective clothes – Rain protection – European standard determining the properties of fabrics and seams of a protective garment. The characteristics of these are measured for the outside of the clothes. After achieving the specific permeability requirements and reaching the appropriate certification, it provides protection against water penetration and resistance against steam penetration for the wearer.

EN ISO 13688:2013 – Protective Plaining – this international standard specifies the general requirements for the implementation of protective workwear in terms of ergonomics, safety, size designation, aging, marking of protective Plaining and the information which is supplied by the protective Plaining manufacturer.

RIMECK®

Where protection and efficiency come first, RIMECK® workwear comes in. The RANGER collections made of high-quality heavyweight materials enhanced with CORDURA® certified material ensure exceptional resistance. The High Visibility line with 3M retroreflective stripes provides security in reduced visibility. T-shirts from the Resist collection can be washed at high temperatures - they remove all dirt and bacteria and thus fulfill even the most demanding hygienic requirements.

HV GUARD 4 IN 1 ^{5V2} £61¹⁰

♂ ♀ 🌧️ 🧥 🧦 🧤 4in1 NEW 3/4

Upper jacket: Oxford, 100 % polyester with PU finish, retroreflective bands 3M, 180 g/m²
 Inner fleece: Polar fleece, 100 % polyester, retroreflective bands 3M, antipilling finish on both sides, 280 g/m²
 waterproof 3 000 mm,
 breathable 3 000 g/m²/24h
 M - 4XL

- ▶ high visibility clothing
- ▶ multipurpose use 4 in 1 in two-colour design

Upper jacket:

- ▶ durable fluorescent fabric
- ▶ certified retroreflective bands 3M
- ▶ full-length molded zipper with flap
- ▶ removable hood with reinforced peak, hidden in the collar
- ▶ hood and bottom hem adjustable by elastic drawstring
- ▶ removable sleeves
- ▶ sleeve hems with elastic band, adjustable with velcro
- ▶ bellow pockets with flap and side pockets
- ▶ breast zip pocket with placket
- ▶ pocket for ID card and pens
- ▶ taped seams
- ▶ access for branding in back lining

certification according to the standards EN ISO 20 471 (class 2, 3), EN 343+A1 (class 31) a EN ISO 13 688

Innerfleece:

- ▶ removable inner fleece jacket
- ▶ insulating fluorescent fabric
- ▶ certified retroreflective stripes 3M
- ▶ full-length molded zipper
- ▶ pockets with molded zipper
- ▶ trimmed by elastic stripe
- ▶ antipilling finish on both sides

certification according to the standards EN ISO 20 471 (class 3) and EN ISO 13 688

NEW 3/4 Novelty. In stock: Third quarter of the year 2020.

- ▶ quick-drying fluorescent fabric
- ▶ retroreflective band on the peak and closure
- ▶ bonded 2 front panels
- ▶ stitched, slightly curved peak
- ▶ embroidered air holes
- ▶ sweatband
- ▶ size adjustable by velcro

Overview of MATERIALS

NATURAL MATERIALS

COTTON

The most popular natural material in the fashion industry. Cotton is characterized by properties such as softness, pliability, strength, absorbency and breathability. It is pleasant to the touch and resists higher temperatures. It is often used in combination with synthetic materials or elastane.

ORGANIC COTTON

Cotton produced from ecologically controlled agriculture and further processed under the strict inspection of all manufacturing processes. The biggest producers are Turkey, India, the USA and China.

For more about GOTS certification see page 17.

NEW MERINO WOOL

Active fiber that regulates body temperature changes and is one of the most breathable natural fibers. The fiber can absorb large amounts of moisture – along with odour molecules in the sweat. Natural elasticity maintains dimensional stability, and the fabric is easy to maintain.

For more information see page 123.

VISCOSE

Fiber made based on regenerated cellulose. The input raw material for the production is wood or cotton pulp. Viscose is breathable and it has great absorption features. Compared to cotton, it is softer, shinier and finer.

BAMBOO FIBER

Fiber made of bamboo based on regenerated cellulose. It has thermoregulatory, antibacterial, antinyctotic and antistatic properties. Bamboo fiber is stronger along with three times higher absorbency than cotton, resistant to frequent washing and keeps its properties for a long time. We do not recommend using fabric softener in order not to reduce absorbency of the material.

SYNTHETIC MATERIALS

ELASTANE

Very fine, strong, elastic polyurethane fiber. The key feature is its high elasticity. Elastane can be stretched out from three up to seven times of its original length without breaking. It is always used in combination with other materials, ensures dimensional stability, increases elasticity and reduces material wrinkling. Elastane is prone to high temperatures.

POLYESTER

Synthetic fiber made by modification of the input material. The fiber is very strong so it can be made thick or very fine (micro polyester). Material is durable, quick-drying and easy-care. It is suitable for sports and physical activities. Through chemical and mechanical processes various modifications of the material properties can be achieved depending on the purpose of use (insulation, impregnation).

POLYAMIDE

The process of polyamide production is similar to the one of polyester. The material is durable, easy-care and has a good shape stability. It dries quickly thanks to low moisture absorption. It has twice the greater abrasion resistance than polyester. The fiber can be made thick or very fine as well as polyester. Mechanical and chemical treatment influences the final product's properties.

POLYPROPYLEN

Smooth and hard surface fibres have high abrasion resistance. They show good hydrophobic properties which, due to very low water sorption, preserve the strength and dimensional stability of the material even in damp environments. The final material is lightweight and shows good thermal insulation.

BRANDED MATERIALS

SUPIMA®

The brand represents the finest cotton of 1% worldwide production. This type of the US grown Pima cotton has over a hundred years' history. Its unique extra-long fibers are twice the strength of regular cotton. They are resistant to pulling, breaking and tearing which makes products made of it incredibly smooth, resistant, non-pilling and keeping their appearance for a long time.

Nanotex® Resists Spills

Certified fabric which has been fundamentally transformed through nanotechnology. The result fabric repels liquids, extends the lifetime, retains natural softness and breathability. When a liquid comes into contact with the fabric, rather than sinking into the fibers, the fluid beads roll right off the surface without leaving a mark.

SOFTSHELL

Softshell is a laminated textile for modern and sports plain weaving and plain weaving for outdoor activities. It is divided into membrane and nonmembrane. Plain weaving made from this material is light, warm, elastic and has high mechanical resistance. Softshell with a membrane can be waterproof and simultaneously air permeable.

CORDURA® CLASSIC

The CORDURA® fabric is made in accordance with approved standards of the company INVISTA. CORDURA® holds of stains, resists tears and abrasions like no other fibers. Its strength ensures high longevity. CORDURA® is a registered trademark of INVISTA for durable fabrics.

3M™ STRIPES

3M retroreflective stripes increase visibility of the person who wears the garment, thereby reduce possibility of accidents. 3M™ technology of reflective materials is based on a layer of microscopic glass spheres mounted on the substrate fabric layer with a mirror surface. On 1 cm² of the fabric there are up to 30,000 glass beads.

NEW SEGMENTED STRIPES

Retroreflective stripes are used to improve visibility during night and bad optical conditions. They are designed for use on safety clothes, with flexibility in mind, preserving full range of motion. These stripes are thermally applied, and can handle washing very well.

Overview of FABRICS

SINGLE JERSEY SLUB

Fine weft knitted fabric with characteristic structure of slub fabric. To achieve this final effect, a yarn with thicker and thinner sections is used throughout the length which are created by varying the tightness of the twist. This fabric is also characterized by its elasticity.

RIB KNIT

Double-sided knitted fabric consisting of rib pattern indicated by 1:1 or 2:2. This information determines the ratio of regularly alternating vertical stripes of stockinette stitch with vertical stripes of reverse stockinette stitch. Rib knit fabric is elastic and it is mostly used for collars, cuffs, plackets and hem of poloshirts and sweatshirts.

POPLIN

Mostly used type of material for shirts production. It is extremely soft, pleasant to the touch, though stiff enough. It is made by a plain weave wave which has a higher amount of warp than weft threads.

SINGLE JERSEY

Fine weft knitted fabric with characteristic dendritic columns on the outside and arches on the reverse side. The weave features ductility, softness and easy unstitching. The quality of the final product depends on the thread used for making the fabric. Products are manufactured from high quality ring spun thread.

FRENCH TERRY - not brushed

Weft knitted fabric with characteristic dendritic columns on the outside and arches on the reverse side. The weave is enhanced with supplementary thread that leads along the reverse side of the fabric. The supplementary thread increases strength, absorption as well as the volume of the fabric.

OXFORD

Wave derived from canvas wave. The difference is that there are at least doubled yarns alternating when fabricating the fabric. Oxford is shinier than canvas. It has a wide range of use. It can be made from natural or synthetic yarns.

PIQUE

Weft knitted fabric patterned with geometrical relief on outside. On the reverse side it is enhanced with supplementary thread. This type of knitting is popular for production of polo shirts and plain weaving ideal for sports and leisure activities. The products made from it are breathable and easy to maintain.

FRENCH TERRY - brushed

Weft knitted fabric with characteristic dendritic columns on the outside and brushed soft on the reverse side. Reverse side of the material enhanced with supplementary thread is fluffed by mechanical process. Such way treated surface has a larger volume and shows warmer properties.

RIP STOP

Very strong regularly repeating wave. In this smooth fabric are interwoven thick warp and weft threads in the intervals of 5 - 8 mm. The surface gets an effect of a grided structure. This imaginary grid significantly increases the fabric rip and tear resistance.

INTERLOCK PIQUE

Warp knitted fabric with a pattern in which two fully interlocking rows alternate with a one-face row. One side of the knitted fabric has twilled separate stitches while the other side is plain. This type of knitting is popular for production of polo shirts and plain weaving ideal for sports and leisure activities. The products made from it are breathable and easy to maintain.

STRETCH FLEECE

Smooth outside, brushed inside functional stretch knit fabric with great thermo isolating properties. It is soft, lightweight, breathable and quick-drying material. It is suitable for sports and physical activities. Inner part of the material has antipilling finish.

TWILL

Wave characteristic by diagonal spacing that is regularly repeated. It consists of alternating the system of warp and weft yarns. The fabric is very robust, tear-resistant and easy-care. The most common use of twill wave is in denim or workwear. The material is also popular for caps production. It can be smooth or brushed. The brush finishing makes the surface softer with matt appearance.

DOUBLE FACE

Double face knitting also called double-sided. The wave is densely alternating front and back uprights on the outside and reverse material sides. In the unstretched position only front stitches are visible, reverse stitches are visible only while stretched. This knitted fabric looks identically from the back and it is highly elastic in the transverse direction.

FLEECE

Weft knitted fabric characteristic with brushed dense teased soft surface on both sides of the material. It has outstanding insulating attributes, long lifetime and easy-care. Material can be treated with antipilling finish. Products are suitable for embroidery and laser engraving.

TERRY

Loop fabric consists of solid loops on both sides of the material. It is a three-dimensional fabric with very soft touch and excellent absorbent properties. It is ideal for towels and bath towels production in the material composition of 100% cotton or blend of bamboo fiber and cotton.

NEW GRID KNIT

Quick-drying, breathable knit for the production of modern, functional clothing. The special grid structure perfectly moves moisture away from the body and expands it onto the fabric surface for fast drying, making it feel fresh, dry but also cooling the body. High elasticity ensures maximum comfort during wear.

PLAIN WEAVE

Plain weave fabric is made of strong, regularly repeating weave that has the same appearance on the outside and reverse side. With its simple and dense interlacing, it creates a steady and smooth surface suitable for printing and embroidery. Plain weave fabrics are manufactured from high quality combed cotton or polyester.

NONWOVEN FABRIC

Fabric produced without knitting or weaving. Input material is a polypropylene polymer melt. The result is a smooth, flat, porous fabric with a relatively high tensile strength and low abrasion and bending strength. The material is popular in the industry due to low acquisition costs and good filtration and insulation properties.

FINISHES

PRESHRUNK COTTON

During the production process of cotton products the space between the fiber gets reduced which eliminates the risk of shrinkage of the fabric during the washing and drying cycle. This process allows the final product to be washed at high temperatures for the purpose of removing any impurities and bacteria.

MERCERIZED COTTON

The process of mercerization consists of immersing the cotton yarn into a bath for the purpose of changing their sections and leveling uneven fibers. The fiber cross-section thus obtains an almost perfect shape. The final material becomes smoother shinier and softer. Mercerization results in higher strength and better color stability of the material.

SILICONE FINISH

The silicone finish is similar to the effect of fabric softener, however longer lasting. It makes the product soft to the touch, more dirt-proof and the prints stick much better.

ANTIPILLING FINISH

Antipilling finish minimizes the release of fibers and prevents fabric's pilling. This process results in fibres fixation and stabilization. It reduces damaging of the upper part under excessive use and friction and extends the product lifetime and functionality.

PU FINISH

A long-lasting polyurethane layer that is applied from one side of the base fabric. It provides water, moisture resistance, abrasion and dirt resistance. Due to the special composition, the layer is very flexible, lightweight and does not negatively affect the other properties of the product.

PA FINISH

Acrylic treatment is used to improve the mechanical and practical properties of the fabric. It is mainly used in outdoor clothing and is characterized by wind resistance and tensile strength.

TPU LAMINATION

Durable top layer made of thermoplastic polyurethane ensures stability of material properties in a wider range of conditions. The combination of the TPU membrane and the top material maintains the flexibility of the product and provides waterproof and abrasion resistant surface with excellent bend and tensile strength.

SILVER COATING

A special matt silver coating applied from the inside of the fabric improves the functional properties of the material. It increases water resistance, prevents transparency of the top material and increases resistance to damage potentially caused by washing.
